RE: Testing of paints and finishes used on our pre-finished products

To whom it may concern,

All of Real Good Toys' pre-finished products are imported from one factory in Thailand. As far as we know, all of the problems the toy industry has experienced in recent months have involved factories in China.

We contacted our factory in Thailand last July and requested independent tests run on all the paints and finishes currently used on our products. The tests were performed by the following laboratory.

Intertek Testing Services (Thailand) Limited
5/1 Phaholyothin 28, Phaholyothin Road, Bangkok 10900 Thailand
thf.thailand@intertek.com

On August 26th we received the results.
Our finishes all passed the Toxic Element Test under U.S. ASTM F963-07.

I trust you will feel confident selling RGT pre-finished dollhouses.

Sincerely,

Jim Abrams,
President
