

Echannel Solutions Inc.

Dear Nicole

I would like to assure you that KidKraft's products are not affected by the recent safety recalls involving lead in paint and magnets. KidKraft does not use the factories involved in these incidents. Our products are designed and tested to meet strict safety requirements for children's products.

We regularly test our products to ensure they meet applicable US regulatory safety standards which include 16 CFR 1500 Federal Hazardous Substances Act (FHSA) for mechanical hazards and flammability and 16 CFR 1303 ban of lead-containing paint (CPSC and CPSA). In addition, we test to the soluble heavy metals content requirements and mechanical hazards of ASTM F-963, which is the standard consumer safety specification on toy safety.

(CFR = Code of Federal Regulations, CPSC = Consumer Product Safety Commission, CPSA = Consumer Product Safety Act, ASTM = American Society for Testing and Materials)

KidKraft is committed to the safety and quality of our children's wooden furniture and toys. You have my commitment that KidKraft remains vigilant in ongoing testing and auditing to deliver products you have come to trust.

Thank you for your continued support.
